

**AMENDMENTS TO THE CLAIMS:**

The following listing of claims will replace all prior versions, and listings, of claims in the captioned Application:

**LISTING OF CLAIMS:**

Claim 1 (currently amended)      A door or window comprising a frame for supporting at least one glass panel and a layer for filtering light radiating therethrough, a seating extending along the frame, in a position corresponding to the periphery of the panel, the seating being spaced apart from the plane in which the glass panel lies, and a tubular light source accommodated by or distributed along the seating for directing light angularly onto the glass panel.

Claim 2 (currently amended)      The door or window set forth in claim 1, wherein the seating has a generally C-shaped section inserted in the frame.

Claim 3 (currently amended)      The door or window set forth in claim 2, wherein the C-shaped section is interposed between the glass panel and a finishing frame affixed to the frame so as to hide the section from view.

Claim 4 (currently amended)      The door or window set forth in claim 1, wherein the frame has a metal section with a first grooved and generally continuous seating for engaging the panel edges and a second, generally parallel, grooved seating for accommodating the light source.

Claim 5 (currently amended)      The door or window set forth in claim 4, wherein the metal section has an intermediate groove between the first grooved seating and the second grooved seating for slidably receiving edges of a movable, reflective curtain.

Claim 6 (currently amended)      A frame of a glazed door or window, the frame having a metal section with a plurality of generally parallel, grooved and continuous seatings extending along a side thereof, a first of the seatings being provided for engaging an edge of a glass panel and a second of the seatings spaced apart from the first being provided for accommodating a tubular light source or a light source distributed along the second seating for directing light angularly onto the glass panel.

Claim 7 (currently amended)      The frame set forth in claim 6, wherein an intermediate groove is provided between the first and second seating for slidably receiving edges of a movable, reflective curtain.

Claim 8 (currently amended)      The frame set forth in claim 6,  
wherein the second seating for accommodating the light source is of sufficient size to  
also contain a power supply unit for the source.

### **REMARKS**

Reconsideration of this Application is respectfully requested. Independent claims  
1 and 6 are amended, without prejudice or disclaimer. Claims 1-8 are in this case.

Initially, the Examiner objected to the drawings under 37 C.F.R. § 1.84(p)(5) on  
grounds that they include reference character 16 which is not mentioned in the  
description. Corrected drawing sheets in compliance with 37 C.F.R. § 1.121(d) or  
amendment to the Specification to add the reference character in the description are  
required in reply to the Office Action to avoid abandonment of the Application.

In response, the Specification is amended at page 4, lines 23-28, as follows:

Advantageously, the light source may be anchored by means  
of the elastic counteracting members **16** to the walls of the  
seating 13, which may be configured in such a way as to  
enable it to accommodate also at least one power supply unit  
**17** for the light source or the light sources contained therein.  
(bold emphasis added).

Withdrawal of the Examiner's objection is, therefore, respectfully requested.

\* \* \* \* \*

Next, the Examiner rejected claims 1-5 under 35 U.S.C. § 112, first paragraph, for  
allegedly failing to comply with the written description requirement. The Examiner  
explains that the claim(s) contain subject matter that is not described in the Specification
